HDOC Day-45

Aim: Write a menu-driven C program using separate functions to change a date format and print all substrings of a string.

Program:

```
#include <stdio.h>
#include <string.h>

void changeDate() {
    int d, m, y;
    char *month[] = {"Jan", "Feb", "Mar", "Apr", "May", "Jun",
                     "Jul", "Aug", "Sep", "Oct", "Nov", "Dec"};
    printf("Enter date (dd/mm/yyyy): ");
    scanf("%d/%d/%d", &d, &m, &y);
    if (m >= 1 && m <= 12 && d >= 1 && d <= 31)
        printf("%02d-%s-%02d\n", d, month[m - 1], y % 100);
    else
        printf("Invalid date!\n");
}

void printSubstrings() {
    char str[100];
    int i, j, k, n;
    printf("Enter a string: ");
    scanf("%99s", str);
    n = strlen(str);
    for (i = 0; i < n; i++) {
        for (j = i; j < n; j++) {
            for (k = i; k <= j; k++)
                printf("%c", str[k]);
            printf("\n");
        }
    }
}

int main() {
    int choice;
    do {
        printf("\n1. Change date format\n");
        printf("2. Print all substrings\n");
        printf("3. Exit\nEnter your choice: ");
        scanf("%d", &choice);
        switch (choice) {
            case 1: changeDate(); break;
            case 2: printSubstrings(); break;
            case 3: printf("Exit\n"); break;
            default: printf("Invalid choice!\n");
        }
    } while (choice != 3);
    return 0;
}
```

Sample Output:

```
1. Change date format
2. Print all substrings
3. Exit
Enter your choice: 1
Enter date (dd/mm/yyyy): 12/10/2026
12-Oct-26

Enter your choice: 2
Enter a string: abc
a
ab
abc
b
bc
c
```
